linkedin.com/in/rafaelso Culver City, CA, USA

## SUMMARY

Delivery-focused SAP Business One leader with 20+ years spanning solution architecture, pre-sales, and full-lifecycle ERP implementations. Currently the Enterprise Applications Manager at Sirio Americas. Previously Director of SAP Business One Consulting at NTT DATA, coordinating cross-functional teams of solution architects, developers, and third-party resources across the full sales-to-delivery lifecycle — quoting, scoping, system build, and go-live. Known for bringing clarity and momentum to fast-moving, multi-workstream environments, resolving discrepancies between sales, delivery, and technical teams before they become bottlenecks, and building the client relationships that keep complex projects on track

## EXPERIENCE

### Enterprise Applications Manager

10/2025 - Present

Sirio Americas

Los Angeles, United States

- Lead the implementation, administration, enhancement, and optimization of the company ERP systems and other business-critical applications. Responsible for ensuring that technology solutions align with the company's operational and strategic objectives, while supporting integration, data analytics, and user adoption initiatives.
- Own and manage the ERP SAP — including system upgrades, customizations, and vendor relationships.
- Oversee the performance and reliability of all business-critical applications to ensure they meet operational and strategic goals.
- Partner with business leaders and department heads to assess system needs and optimize technology usage across the organization.

### Director of SAP Business One Consulting

09/2019 - 10/2025

NTT DATA Business Solutions

Remote

- Serve as a key connector between pre-sales, delivery, and technical teams, coordinating client requests — quotes, scoping, system builds, and go-live timelines — to keep projects moving without stalls
- Lead pre-sales activities including quote preparation, solution demos, and Statement of Work (SOW) development, translating client needs into accurate technical and delivery documentation
- Direct teams of application consultants, solution architects, developers, and third-party resources, resolving cross-team discrepancies and proactively identifying bottlenecks before they slow delivery
- Leveraged SAP BTP to develop cloud-based extensions for the SAP Business One new Web Client
- Reduced project setup time from 5 weeks to 4 weeks across 15 projects, saving 300 project hours and improving delivery consistency from 60% to 84%

### Project Manager, SAP Business One

07/2017 - 08/2019

Softengine, Inc

Los Angeles, United States

- Returned to lead more complex, enterprise-level implementations
- Managed end-to-end project delivery for SAP Business One implementations, coordinating between clients, technical consultants, and internal stakeholders across concurrent engagements
- Applied PMI-based project management practices to track timelines, scope, and risk across multi-segment client projects

## SKILLS

## EXPERIENCE

### Project Manager
01/2014 - 07/2017

Quest Nutrition — Los Angeles, United States

- Led project management for the initial SAP Business One ERP, WMS and Ecommerce implementation, coordinating cross-functional teams through requirements gathering, build, and rollout
- Implementation and rollout of the BI tool DOMO which functioned as the main business dashboard
- Managed the subsequent migration project from SAP Business One to Microsoft Dynamics AX 2012 R3, a complex, multi-team system transition delivered on schedule

### Project Manager, SAP Business One
05/2012 - 12/2013

Softengine, Inc — Los Angeles, United States

- Led SAP Business One project delivery. Coordinated with clients, consultants, developers, and stakeholders for concurrent projects.

### IT Project Leader
09/2011 - 05/2012

BMW do Brasil — Sao Paulo, Brazil

- Executed multiple IT projects alignment across Finance, Procurement and Sales departments by coordinating with internal teams

### SAP Business One Consultant
08/2009 - 09/2011

Ramo Sistemas Digitais LTDA — Sao Paulo, Brazil

- Consulted on SAP Business One implementations for clients across multiple industry segments
- Coordinated $1.2 million Jaguar Land Rover Brazil project delivery across 2 countries as team leader

### SAP Business One Add-On Support & Development
08/2007 - 08/2009

TWX (MMB1) — Minas Gerais, Brazil

- Supported and developed SAP Business One add-ons using C# and SAP Business One SDK across WMS (Warehouse Management System), SFA (Sales Force Automation), and Business Intelligence.
- Led team of 8 consultants, conducting technical review of 20+ candidate CVs.
